

## The Breakers Chooses New Line of LATHER Skincare Products

LATHER has partnered with The Breakers, a 140-acre luxury resort in the heart of Palm Beach, Fla., to unveil an exclusive line of skincare products. The Breakers Sea Glass collection is gently formulated with natural, rich ingredients and soothing botanical blends.

The Breakers Sea Glass collection offers a custom blend of natural ingredients and marine extracts. Each formulation contains beneficial extract blends such as Sea Algae, Sea Kelp, Spirulina, Aloe, Wheat Germ Oil, Witch Hazel, Mango, Coconut and Orange Peel. Free of sulfates, parabens, DEA, TEA, phthalates, propylene glycol, mineral oil, artificial colorants and any harsh chemicals, the six products anchoring The Breakers Sea Glass collection include:

**Shampoo**—a nourishing formula that gently cleanses and softens hair using marine and botanical extracts, including Atlantic Kelp, Coconut, Wheat Germ Oil and Provitamin B5.

**Conditioner**—a deeply hydrating treatment that moisturizes and enhances shine, with Sea Algae, Coconut, Wheat Germ Oil and Provitamin B5.

**Shower Gel**—a luxurious body wash with skin-softening marine and botanical extract blends of Spirulina, Mango and Vitamins A, D and E.

**Body Lotion**—this botanically-rich and fresh-scented body lotion uses Sea Whip, Aloe Vera and Vitamins A, D and E to soothe and hydrate skin.

**Body Soap**—One hundred percent vegetable-based and infused with organic fair trade shea butter, this body soap gently cleanses and moisturizes dry skin. Sustainable palm oil and sea kelp extracts leave skin soft and silky.

**Face Soap**—This 100 percent vegetable-based glycerin face soap hydrates and softens skin.

The Breakers Sea Glass collection also comes with a complete line of accessories.

The theme of "Sea Glass" is apparent throughout this eco-friendly collection, from the formulas to the design to the shape of the soaps. The shampoo, conditioner, shower gel and body lotion are all packaged in upscale cylinder bottles with shiny chrome disc caps that are easy to use, paired with oceanic blue bottles that are made from 50 percent recycled water bottles. Inspired by the unique aesthetic of sea glass, the body and face soaps are ergonomically designed in a sea glass pebble shape and encased in matchbox style cartons made from 100 percent recycled cardboard materials. And, all packaging is printed with environmentally friendly soy-based inks.
